

PHILIPS

CTC Course

RANZCR 2026

In partnership with internationally recognised experts in their field, this two-day course is intended for Radiologists and Radiographers with an interest in gastrointestinal imaging. This workshop comprises a number of lectures and hands-on learning. Using the Philips Intellispace Portal advanced visualisation software, a selection of over 50 library cases will be reviewed during the session covering a range of polyps, colorectal carcinoma and pseudolesions.

Faculty

Dr Helen Moore

Dr Helen Moore obtained her FRANZCR in 2000, and completed an Advanced Training Position in MRI at Monash Medical Centre (2002). Her main interests are abdominal and pelvic imaging, and she is a Body imaging sub-specialist at Auckland City Hospital, and at Auckland Radiology Group where she has been performing CT Colonography since 2003. She has published several papers on CTC and presented lectures on the topic at international meetings and workshops. She served three terms on the executive committee of ARGANZ and is on the RANZCR CTC Accreditation committee. She served on the NZ National Bowel cancer Working group from 2015-2019, and the Northern Regional Bowel Cancer Tumour Stream 2010-2021.

Dr Jane Reeve

Dr Jane Reeve received her fellowship in 2007. She has worked at Middlemore Hospital, for Queensland X-ray in Brisbane and since 2012, has worked as a Body imaging sub-specialist at Auckland District Health board and for Mercy Radiology, where she specialised in Oncological Imaging and PET CT. She has been reporting CT Colonography since 2012 and heads the CT Colonography service at Auckland District Health board. She has co-authored papers on CT Colonography.
